

1 **mr mohawk**
 We've had our eyes on this outrageous rainbow fur for a while. It wasn't cheap, but we just needed a small amount to create an instant mohawk.

Convert your plain old beanies with these four easy beanie facelifts!

2 **watching you!**
 There's huge potential for fun with this one. First we cut out bushy eyebrows from felt. Using the eraser on the end of a pencil as a stamper, we painted polka dots using Resene Dizzy Lizzy (green) and Turbo (yellow). The sew-on eyes went on first, with the brows positioned behind.

4 ways with beanies

3

flower power
 We cut flower shapes in two different sizes from felt, used a pen for dotted detailing, and sewed the flowers in place with a cute petal-shaped button.

4 **pompom mania**
 These pompoms came in a pack of assorted colours and sizes, so it was a case of instant impact once they were sewn on. Pompoms the kids made themselves would be even better.

Beanies made and photographed by Rebecca Zwitser

 em up**

Expand your children's playing area onto their walls with Resene Magnetic Magic

Creating a magnetic masterpiece is child's play – simply prepare and prime the surface, apply **Resene Magnetic Magic** in two smooth coats and topcoat in your favourite Resene colour.

Formulated with more 'attraction', this magnetic coating is loaded with iron oxides for maximum magnetic effect.

Once you've done the hard work, arm your children with magnets and let them do the decorating!

Available only from Resene.
