- so available as a Resene CoolColour<sup>111</sup>. A change in tone or product may be required for colour effect. CoolColour and standard variants of a specific colo ht colour differences depending on the degree and type of light, which naturally varies with
- n undercoat is recommended for the optimum finish.

e approximate light reflectance value (LRV) of a colour indicates the amount of visible light t light reflectance value of 0% and absorbs all light. The surfaces are consequent contrast, white has a light reflectance value of 100% and keeps a building light of the surface of the total solar reflectance (TSR) properties compared to a normal colour, keeping the

increase the colour range that can be suitable over some heat sensitive refer Resene for further information

Note 3: Tones listed above are subject to change if colours are reformulated.

ote 4: Colours may be available in selected products or sizes only. Check with Resene ColorShop or Reseller staff ure your selected colour is available in the product and/or size you require.

ote 5: This colour chart is finished with Resene SpaceCote Low Sheen waterborne enamel, a product ideally ited to kitchens, bathrooms and broadwall areas.

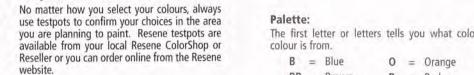

#### Explore a colour library

View an extensive range of Resene colour swatches in the online Resene colour library then download the ones you like. Once you have found your favourites, order testpots online and try them out for yourself in the real world. Or browse through the in-store libraries of colour that can be found at Resene ColorShops and Resellers. With thousands of variously coloured A4 swatches to pore over, you're bound to find one that suits.

'See' the finish Virtual painting with Virtual painting with Resene EzyPaint allows you to visualise the entire colour scheme before the redecorating even starts. See the Resene website, www.resene.com/ezypaint.

#### Put your colour to the test

#### Choose the right product

We have an extensive range of paints, coatings, wood stains and more to suit your decorating projects. View the Resene Recommended pain. systems brochure or contact Resene staff for help choosing the right paint system for your project.

## Keep your project cooler

If you are planning to use dark colours outside consider investing in a Resene CoolColour. Colours made using Resene CoolColour colour minimising the stress on the coating the colour. and the substrate and reducing unwanted heat buildup inside. Check with Resene ColorShop or Reseller staff to see whether a Resene CoolColour is right for your project.

# Choose to help the environment

You can minimise the effect your next (central tendency of wavelength) decorating project has on the environment Environmental Choice approved products.

# Enjoy the Resene Promise of quality

Enjoy the Resene Promise of quality on a wide range of Resene premium paints. See your Resene ColorShop or Reseller or the Resene website for a copy.

# Be PaintWise

For tips on how to minimise the impact of your decorating on the environment see www.resene.com/paintwise.

# Resene the paint the professionals use

the paint the professionals use

02/16

# Coding system

The Resene Total Colour System is a method of colour formulation. notation and presentation. Resene Total Colour codes enable you to make direct comparisons on three attributes between multiple

you are planning to paint. Resene testpots are The first letter or letters tells you what colour palette the

R	=	Blue	0	=	Orange	
BR	=	Brown	R	=	Red	
G	=	Green	٧	=	Violet	
М	=	Metallics	Y	=	Yellow	
Ν	=	Neutral				

#### Luminance: (spread of wavelength)

The first digits denote the colour's luminance, with 0 being approximately black and 100 being approximately white. The higher the number the lighter the colour.

### Greyness/Saturation:

(amplitude of wavelength) technology reflect more heat than a standard The second set of digits denotes the saturation or purity of

000 = Resene Black, 198 = Resene Turbo (bright yellow).

The higher the number the greater the saturation and the cleaner (more pure) the colour. 0 is completely unsaturated neutral grey, black or white.

# Colour wheel position:

The last set of digits tells you where the colour sits on a wheel by choosing one of the Resene range of of colour of 0 to 360 degrees. This dissects colour into colour types of red, yellow, etc.

> It allows you to place multiple colours into a sequence and determine the relative positioning of colours.

1800 738 383 0800 RESENE (737 363) www.resene.com.au www.resene.co.nz

e slight colour differences depending on the degree and type of light, which naturally

An undercoat is recommended for the optimum finish.

lote 1: The approximate light reflectance value (LRV) of a colour indi ating, substrate and building cooler.

Vote 2: Mid to dark colours are not suitable for some exterior substrates and if used may cause dan ibstrate, such as warping, checking and premature failure. Always check with the substrate suppli-mmencing any work to ensure colour selections fit within their audelines. Resene also manufacture and the supplication of th CoolColour technology and this may increase the colour range that can be suitable over some heat sen-vubstrates - refer Resene for further information.

Note 3: Tones listed above are subject to change if colours are reformulated.

Note 4: Colours may be available in selected products or sizes only. Check with Resene ColorShop or Re to ensure your selected colour is available in the product and/or size you require.

Note 5: This colour chart is finished with Resene SpaceCote Low Sheen waterborne enamel, a product suited to kitchens, bathrooms and broadwall areas.

oduction of the colours shown in this colour range is only available using genui num products, tinters and formulations. These are not available from oth of Resene colours and colour names b urs may appear to vary with different glos le before making your final choice. Printed on envir ible paper produced in an ISO14001 (Environmental Management System) accred m Elemental Chlorine Free (ECF) pulp sourced from sustainable forests and plantati vegetable-based inks. Please recycle.

 C = A B d valiable is a needle CollCollour 4 Rectar.<math>r = An undercoat is recommended for the optimum finish.The approximate light reflectance value (RV) of a colour indicates the amount of visible light four will reflect. Black has a light reflectance value of 0% and absorbs all light. The surfaces aquently very dark and can get very hot. In contrast, white has a light reflectance value of 10% and absorbs all ight and cool. All colours fit within theses the Assence CoolColour<sup>4</sup> is a building light and cool. All colours fit within these two extremes. A Resence CoolColour<sup>4</sup> is do reflect more of the sun's energy, improving the colour sheat and total solar reflectance perties compared to a normal colour, keeping the coating, substrate and building coder. Wid to dark colours are not suitable for some exterior substrates and if used may cause damage bstrate, such as warping, checking and premature failure. Always check with the substrate ress Resene CoolColour technology and this may increase the colour range that can be suitable heat sensitive substrates – refer Resene for further information. ness listed above are subject to change if colours are reformulated. olours may be available in selected products or sizes only. Check with Resene CoolColour is colour chart is finished with Resene SpaceCote Low Sheen waterborne enamel, a product at to kitchens, bathrooms and broadwall areas.
