Need a respite from the busyness of everyday life? Embracing the colours of nature helps you create a space that is surprisingly versatile and neutral in style. While we may think of leaves as simply green, we have a lot to learn from Mother Nature's art of layering up related colours to add depth and interest without overwhelming the senses.

Designers and homeowners so often layer up their favourite whites and neutrals, but as we look to nature to bring wellbeing inside, hues like olive greens are becoming a versatile alternative to make a space that is tranquil and soothing.

Choose olive hues with undertones of warm brown to ground your room, green to add freshness and yellow to add a pick-me-up dose of energy. Team with timber flooring and cabinetry stained in Resene Colorwood to fully embrace the charm of a rustic walk in nature or add a little extra warmth with a terracotta hue like Resene Sunbaked. Take your colour beyond the wall and use Resene testpots in related colours to bring accessories such as frames and ornaments into your room's palette.

And bring in feel-good texture with patterned Resene wallpaper and foraged finds to elevate your cosy olive cocoon of colour.
