Cherry on top
 Add a touch of opulence to your interiors with a dash of red. Be it a vivid punch of Resene Vibe or the bold intensity of Resene Smashing, these hues instantly energise a space. Offset with soft pinks for a romantic contrast that feels fresh, modern, and perfectly suited to the shift into spring.

Merlot moments

Ease the transition from winter's deeper palettes with rich burgundy and lush purples. These shades are especially suited to intimate spaces: use Resene Burgundy in a dining room to create a cocooning, elegant atmosphere, or introduce Resene Geronimo on cabinetry or feature walls for a bold, contemporary edge. Balance the richness with warm neutrals, textured linens, and brass accents for a layered, considered look.

LA VIE EN ROSE

Powder pink is having a moment. On the spring/summer runways, it took centre stage: Brandon Maxwell's glossy gowns brought glamour, Khaite's sheer separates whispered femininity, and Gucci's twinsets – layered with cherry red – added bold contrast. At home, take a softer approach with barely there tones such as Resene Pale Rose for a refreshing breath of colour, or dial it up slightly with Resene Cupid for a romantic, rosy glow.
