create some calm

New Zealand design company Città has launched Still Life - their Autumn/Winter 2020 collection. This collection celebrates the simple beauty of objects and invites you to appreciate the still life compositions in your home.

Still Life's organic palette takes inspiration from nature, with calming tones of mossy green, earthy brown, smoky pepper and warm biscuit. The materials of the collection give a further nod to nature with relaxed linen, cosy wool, warming wood and hand-woven baskets.

Settle into the perfect winter's day as you seek moments of calmness and allow yourself to be truly still. Available in store and online now at www.cittadesign.com.

Resene Aqua

A Showerdome® shower top consists of a clear acrylic dome that prevents steam from forming when fitted on top of an existing shower box. With no ongoing costs, it is an effective investment you can make for a home or rental property. Showerdome® also makes mirror demisters and extractor fans redundant and could save the average household around \$250 in energy costs alone every year. To learn more, visit www.showerdome.co.nz.

We have one DIY Showerdome® kit to give away, valued at \$299. Installation by an official local Showerdome® installer is available at standard pricing.

hybrid technology worth the hype

Brand new waterborne alkyd hybrid technology has arrived, combining the best of solventborne and waterborne paints! This new evolution keeps the environment in mind and boasts added performance benefits. They may look like a traditional solventborne paint but they share the easy water wash-up and lower VOCs of a waterborne paint. While slower to dry, waterborne alkyd paints have a tougher finish than waterborne enamels and give you more time to work the finish without excessive brush or roller marks.

Resene Room Velvet is now available as a waterborne alkyd finish. Find out more at your local Resene ColorShop or reseller, www.resene.com/colorshops.

don't let your paint catch a cold

Resene Fahrenheit 

Painting in winter can be challenging with the cold temperatures and humidity from wet weather slowing drying time and potentially affecting the finish. The tech experts at Resene have a solution: Resene Wintergrade paints and Resene Wintergrade Additive, designed to dry in temperatures down to 3°C. The Resene technical team first developed a small range of winterised products that will dry in cold temperatures, which have been used in winter conditions for over 10 years.

To make it even easier to choose a wintergrade finish, Resene now offers Resene Wintergrade Additive, which you can add to a range of selected waterborne Resene paints to winterise them. This will enable you to achieve a wintergrade finish in a wider range of products and colours. Resene Wintergrade paints are available from April to August from Resene ColorShops and selected resellers. Learn more at www.resene.com/wintergrade.
