Colour in art

You can use lots of different colours and mediums to create artwork. Sometimes you might use dry mediums, such as crayons and chalk. Sometimes you might use wet mediums, such as paints and dyes. Sometimes you might use both together! Each type of medium will affect the colour you see and also how you create the picture.

Everywhere colour - Colour in art 1

Notes			
Notes			

If you want to use chalk to create your picture you are best to use a blackboard. This is because chalk contains a lot of white and will show up best on a black surface. If you try drawing a chalk picture onto a white page the chalk picture will be harder to draw and see.
