

KAREN WALKER PAINTS

OUR INSPIRATION FOR THIS CHART CAME FROM THE BAUHAUS SCHOOL OF THE 1920s WHOSE CONCEPT WAS TO CREATE AND COMBINE COLOURS FROM AN EMOTIONAL POINT OF VIEW RATHER THAN A TECHNICAL ONE. TO GROUP COLOURS IN A WAY THAT TELLS A STORY RATHER THAN SIMPLY MATCHING THEM TONALLY.

WITH THIS IN MIND WE'VE CREATED SIX STORIES THAT, TRUE TO THE KAREN WALKER STYLE, PLAY WITH THE COMBINING OF OPPOSITES AND PUTTING TOGETHER OF IDEAS IN SURPRISING WAYS.

WE HOPE THAT NOT ONLY WILL YOU LIKE THE COLOURS BUT THAT THE IDEAS WE PRESENT IN TERMS OF MIXING THEM TOGETHER WILL INSPIRE YOU TO TELL A COLOUR STORY OF YOUR OWN.

KEY L = Light P = Pastel U = Ultra deep
D = Deep M = Mid PS = Pearl Shimmer W = White
G = Green O = Ochre SA = Silver aluminium Y = Yellow 2
CC = Also available as a Cool Colour.

NOTE 01 The approximate light reflectance value (LRV) of a colour indicates the amount of visible light that a colour will reflect. Black has a light reflectance value of 0% and absorbs all light. The surfaces are consequently very dark and can get very hot. In contrast, white has a light reflectance value of 100% and keeps a building light and cool. All colours fit within these two extremes. Resene Cool Colours look the same as standard colours but are formulated to reflect the sun's energy and have better heat and total solar reflectance (TSR) properties. They reflect the same visible light as a standard colour but reflect significantly more heat, keeping the coating, substrate and building cooler.

NOTE 02 Mid to dark colours are not suitable for some exterior substrates and if used may cause damage to the substrate, such as warping, checking and premature failure. Always check with the substrate supplier prior to commencing any work to ensure colour selections fit within their guidelines. Resene also manufactures Resene Cool Colour technology and this may increase the colour range that can be suitable over some heat sensitive substrates - refer Resene for further information.

NOTE 03 Tones listed above are subject to change if colours are reformulated.

NOTE 04 Colours may be available in selected products or sizes only. Check with Resene ColorShop or Reseller staff to ensure your selected colour is available in the product and/or size you require.

NOTE 05 This colour chart is finished with Resene SpaceCote Low Sheen waterborne enamel, a product ideally suited to kitchens, bathrooms, broadwall areas and trim and joinery inside and out. Metallic chips finished with Resene Enamacryl Metallic.

Printed on environmentally responsible paper, which complies with the requirements of environmental management systems (EMS) and ISO 14001, using vegetable based inks.
