

Resene colour charts are updated regularly. This colour chart file is part of the colour chart archive, which we provide so you can view Resene colours that have been available over the years. Most older colours can still be tinted – check with your Resene ColorShop team if you need an older colour for your project.

Resene

Whites & neutrals

Resene

the paint the professionals use

A collection of colours ranging from
brightest whites to rich creams and
strong beiges, ideal on their own
or as a contrast to stronger colours.

Inspired by our local landscapes,
the subtleties of the natural environment
are captured in this range.

Whites and neutrals are the
perfect backdrop to any setting,
both interior and exterior,
contemporary and traditional.

Picture to palette

Not sure which colour to choose? Turn your favourite photo into a Resene colour palette using the free online Resene Palette Generator. Using your photo, the Resene Palette Generator creates a colour palette of Resene colours that reflects the colours in your picture. You can use your favourite pictures to inspire your colour schemes. Or scan in a favourite flower, shell or painting and use that as inspiration for your next colour palette. Try it out for yourself at www.resene.com/picturepalette.

Explore a colour library

View an extensive range of Resene colour swatches in the online Resene colour library, then download the ones you like. Once you have found your favourites, order testpots online and try them out for yourself in the real world. Or browse through the in-store libraries of colour that can be found at most Resene ColorShops and Resellers. With thousands of variously coloured A4 swatches to pore over, you're bound to find one that suits.

'See' the finish

Virtual painting with Resene EzyPaint allows you to visualise the entire colour scheme before the redecorating even starts. Available free from the Resene website, www.resene.com/ezypaint.

Put your colour to the test

No matter how you select your colours, always use testpots to confirm your choices in the area you are planning to paint. Resene testpots are available from your local Resene ColorShop or Reseller or you can order online from the Resene website.

Get the inside look you want

The desirable low sheen interior look is easily achieved using Resene SpaceCote Low Sheen, a waterborne enamel combining versatility, enamel style toughness and durability with a highly desirable low sheen finish. Suitable for use in all interior areas from bathrooms and kitchens to broadwall areas. Best of all, being waterborne and lower odour than the enamel products it will often replace, you can get in and do the painting without disrupting your lifestyle and with a quick water clean up you'll be finished in next to no time. Also available in Resene SpaceCote Low Sheen Kitchen & Bathroom with anti-bacterial silver and MoulDefender for added protection in wet areas.

Opt for a natural look

Whites and neutrals are popular teamed with the dead flat mineral effect finish of Resene AquaShield, resulting in a natural earthy appearance that blends beautifully with the landscape. Ideal for exterior concrete on buildings and landscaping features.

Be PaintWise

For tips on minimising the impact of your decorating on the environment see www.resene.com/paintwise.htm.

Enjoy the Resene Promise of Quality Guarantee

Enjoy the Resene Promise of Quality Guarantee on a wide range of Resene premium paints. See your Resene ColorShop or the Resene website for a copy.

Choose to help the environment

You can minimise the effect your next decorating project has on the environment by choosing one of the Resene range of Environmental Choice approved products.

Our commitment to sustainability led to Resene being named Sustainable Business of the Year at the 2010 National Sustainable Business Awards.

Key: L = Light M = Mid O = Ochre P = Pastel W = White
cc = Also available as a Resene CoolColour™. A change in tone or product may be required for some colours to achieve a Resene CoolColour effect.

Note 1: The approximate light reflectance value (LRV) of a colour indicates the amount of visible light that a colour will reflect. Black has a light reflectance value of 0% and absorbs all light. The surfaces are consequently very dark and can get very hot. In contrast, white has a light reflectance value of 100% and keeps a building light and cool. All colours fit within these two extremes. A Resene CoolColour™ is formulated to reflect more of the sun's energy, improving the colour's heat and total solar reflectance (TSR) properties compared to a normal colour, keeping the coating, substrate and building cooler.

Note 2: Mid to dark colours are not suitable for some exterior substrates and if used may cause damage to the substrate, such as warping, checking and premature failure. Always check with the substrate supplier prior to commencing any work to ensure colour selections fit within their guidelines. Resene also manufactures Resene CoolColour technology and this may increase the colour range that can be suitable over some heat sensitive substrates - refer Resene for further information.

Note 3: Tones listed above are subject to change if colours are reformulated.

Note 4: Colours may be available in selected products or sizes only. Check with Resene ColorShop or Reseller staff to ensure your selected colour is available in the product and/or size you require.

Note 5: This colour chart is finished with Resene SpaceCote Low Sheen waterborne enamel, a product ideally suited to kitchens, bathrooms and broadwall areas.

Note 6: Colours marked with C have been matched to the equivalent COLORBOND® or COLORSTEEL® colour samples in 2009. If an exact match is required we recommend you check your chosen colour against the actual sample of the product prior to purchasing. COLORBOND® is a registered trademark of Bluescope Steel Limited. COLORSTEEL® is a registered trademark of New Zealand Steel Limited.
