

# Resene

## Whites & neutrals

# Resene

the paint the professionals use

A collection of colours ranging from brightest whites to rich creams and strong beiges, ideal on their own or as a contrast to stronger colours.

Inspired by our local landscapes, the subtleties of the natural environment are captured in this range.

Whites and neutrals are the perfect backdrop to any setting, both interior and exterior, contemporary and traditional.

## Get the inside look you want

The desirable low sheen interior look is easily achieved using Resene SpaceCote Low Sheen, a durable waterborne enamel combining versatility, enamel style toughness and durability with a highly desirable low sheen finish. Suitable for use in all interior areas from bathrooms and kitchens to broadwall areas. Best of all, being waterborne and lower odour than the enamel products it will often replace, you can get in and do the painting without disrupting your lifestyle and with a quick water clean up you'll be finished in next to no time. Also available in Resene SpaceCote Low Sheen Kitchen & Bathroom with anti-bacterial silver and MoulDefender for added protection in wet areas.

## Opt for a natural look

Whites and neutrals are popular teamed with the dead flat mineral effect finish of Resene AquaShield, resulting in a natural earthy appearance that blends beautifully with the landscape. Ideal for exterior concrete on buildings and landscaping features.

## Or go mediterranean

The time-worn strength of sandstone with the mellow patina of age has been recreated in Resene Sandtex. Perfect for beautifying and protecting concrete both inside and out, this very versatile finish may be used to reproduce a variety of finishes from aged render effects through to natural limestone and sandstone finishes. The fine sandstone texture adds an extra dimension to the coating and effectively disguises minor surface blemishes without changing the basic architectural concept. Perfect in the great outdoors or as an interior feature.

## Explore a colour library

View an extensive range of Resene colour swatches in the online Resene colour library, then download the ones you like. Once you have found your favourites, order testpots online and try them out for yourself in the real world. Or browse through the in-store libraries of colour that can be found at most Resene ColorShops. With over 3000 variously coloured A4 swatches to pore over, you're bound to find one that suits.

## 'See' the finish

Virtual painting with Resene EzyPaint allows you to visualise the entire colour scheme before the redecorating even starts. Download Resene EzyPaint free from the Resene website or purchase a copy from your local Resene ColorShop or Reseller.

## Put your colour to the test

No matter how you select your colours, always use testpots to confirm your choices in the area you are planning to paint. Resene testpots are available from your local Resene ColorShop or Reseller or you can order online from the Resene website.

## Be PaintWise

For tips on minimising the impact of your decorating on the environment see [www.resene.com/paintwise.htm](http://www.resene.com/paintwise.htm).

## Enjoy the Resene Promise of quality

Enjoy the Resene Promise of quality on a wide range of Resene premium paints. See your Resene ColorShop or the Resene website for a copy.

## Choose to help the environment

You can minimise the effect your next decorating project has on the environment by choosing one of the Resene range of Environmental Choice approved products.

**Key:** L = Light M = Mid P = Pastel W = White  
CC = Also available as a Resene Cool Colour. A change in tone or product may be required for some colours to achieve a Resene Cool Colour effect.

**Note 1:** The approximate light reflectance value (LRV) of a colour indicates the amount of visible light that a colour will reflect. Black has a light reflectance value of 0% and absorbs all light. The surfaces are consequently very dark and can get very hot. In contrast, white has a light reflectance value of 100% and keeps a building light and cool. All colours fit within these two extremes. Resene Cool Colours look the same as standard colours but are formulated to reflect the sun's energy and have better heat and total solar reflectance (TSR) properties. They reflect the same visible light as a standard colour but reflect significantly more heat, keeping the coating, substrate and building cooler.

**Note 2:** Mid to dark colours are not suitable for some exterior substrates and if used may cause damage to the substrate, such as warping, checking and premature failure. Always check with the substrate supplier prior to commencing any work to ensure colour selections fit within their guidelines. Resene also manufactures Resene Cool Colour technology and this may increase the colour range that can be suitable over some heat sensitive substrates - refer Resene for further information.

**Note 3:** Tones listed above are subject to change if colours are reformulated.

**Note 4:** Colours may be available in selected products or sizes only. Check with Resene ColorShop or Reseller staff to ensure your selected colour is available in the product and/or size you require.

**Note 5:** This colour chart is finished with Resene SpaceCote Low Sheen waterborne enamel, a product ideally suited to kitchens, bathrooms, broadwall areas and trim and joinery inside and out.
