

Resene colour charts are updated regularly. This colour chart file is part of the colour chart archive, which we provide so you can view Resene colours that have been available over the years. Most older colours can still be tinted – check with your Resene ColorShop team if you need an older colour for your project.

To view the latest Resene colour charts, visit [www.resene.com/colour-charts](http://www.resene.com/colour-charts)

## Woodman

### penetrating oil stain

Resene Waterborne Woodsman is a new approach to wood stains matching the needs of timber to the desire to achieve the most natural appearance possible. Maximum mould resistance has been achieved through the inclusion of powerful fungicides.

With an adaptable formulation, Resene Waterborne Woodsman is suitable for use on a wide range of exterior timber substrates including:

- Dressed and Rough Sawn Timber
- Plywood and Profiled Sheets
- Fences
- Weatherboards
- Garden Furniture
- Beams

Resene Waterborne Woodsman is easy to apply and requires minimum surface preparation. For **New Timber**, ensure surface is dry and free from dirt, dust and loose fibres. For **Exposed Timber** (greater than one week), remove any gross contamination and semi-detached cellulose fibres, and treat the surface for mould using Resene Moss & Mould Killer (Data Sheet D8o). For **Existing Stained Surfaces**, remove all the weakly adhering coating by sanding and treat the surface for mould using Resene Moss & Mould Killer (Data Sheet D8o).

Apply two coats of Resene Waterborne Woodsman by brush, roller or spray following the recommended coverage rates below. During application stir the contents of the can frequently to ensure even distribution of colour. When the job is complete, clean up with water when wet or mineral turps when dry.

#### Typical coverage

TIMBER TYPE	FIRST COAT	SECOND COAT
Badly Weathered Timber	3-4 square metres per litre	5-7 square metres per litre
Rough Sawn Timber	4-6 square metres per litre	9-11 square metres per litre
Dressed Timber*	10-12 square metres per litre	12-14 square metres per litre

\*For Dressed Timber, apply a third coat 12-14 square metres per litre after about 3-6 months.

Resene Waterborne Woodsman will require maintenance after two summers.

All colours on this chart are available in Waterborne Woodsman. A smaller selection of colours is available in Resene Woodsman, a solventborne exterior wood stain. Check the availability of your desired colour with your local Resene ColorShop if you wish to use solventborne Woodsman.

The Resene Woodcare range offers do-it-yourself and trade professionals products suitable for almost every interior and exterior timber application. For information on our range of other Woodcare products, including Resene Waterborne Colorwood, Lumbersider, Qristal Clear Finishes, Aquaclear and Polythane, contact your nearest Resene ColorShop. For further technical information on Resene Waterborne Woodsman see Data Sheet D57a and for Resene Woodsman, see Data Sheet D57.

NB. The final finish will vary depending on the timber you are staining. Always test your chosen colour on a representative sample of timber. Resene testpots are available from Resene ColorShops nationwide.

## products for all projects

**Resene has a comprehensive range of products and decorating tools for all areas in and around the home, including products that are ideal for all those backyard projects.**

### **Kwila Decking Stain**

Resene Kwila Decking Stain is ideally suited for new timber and timber that requires a little rejuvenation. Formulated for kwila, it is also ideal over other exotic hardwoods.

### **Complement with a Solid Colour Finish**

Two coats of Resene Lumbersider will add colour to your fence, deck, outdoor furniture or walls in next to no time. Check out the Resene Lumbersider Chart for some earthy tones perfect for the great outdoors.

### **Steps, Paths and Driveways**

Giving your paths and steps a fresh coat of paint can do wonders for the overall look of your entranceway. Simply wash down the existing coating, remove any loose flaking material and recoat using two coats of Resene Sidewalk. Or for a more natural look, add colour to cementitious surfaces with Resene Concrete Stain, which is designed to penetrate the surface of concrete and masonry to form a tough low sheen finish that enhances the natural texture of the concrete. See the Paving Coatings colour chart for a full range of paving paints and stains.

### **Swimming Pools**

After a hard day's work, relaxing in a swimming pool is always popular. Resene Swimming Pool Paint has been specially designed for direct application to concrete swimming pools. A pool coated in Resene Swimming Pool Paint 'Magic Blue' will be less affected by chemicals used for treating pools than traditional pigmented pool finishes. The result is a longer lasting colour, giving you more time to enjoy your pool because you'll spend less time repainting it.

### **Planters**

Textured, colourwashed, painted or stained... Resene has a wide range of products suitable for decorating planters. Available in hundreds of colours, Resene testpots allow you to add colour to your garden planters without being left with litres of excess paint.

### **Interior Wood Stains**

If you wish to continue the natural timber theme inside, Resene Waterborne Colorwood interior wood stain is the perfect way to colour interior timber while still allowing the natural grain to show through.

### **'See' the Finish**

Virtual painting with Resene EzyPaint allows you to visualise the entire colour scheme before the redecorating even starts. Resene EzyPaint can be downloaded free from the Resene website [www.resene.com](http://www.resene.com) or purchased on CD-Rom from your local Resene ColorShop.

### **Choose to Help the Environment**

You can minimise the effect your next decorating project has on the environment by choosing one of the Resene range of Environmental Choice approved products. Resene Waterborne Woodsman is an Environmental Choice approved product.
