

Hanging out

This handy industrial moodboard makes for an easy Saturday afternoon project.

Project & styling **Gem Adams** Photography **Wendy Fenwick**

YOU WILL NEED

Reinforcing steel, available from Mitre 10 (ask them to cut the size down for you).
Resene GP Metal Primer
Resene Black in flat
Paint brush
3 small nails

1. This reinforcing steel usually comes a bit rusty, so brush it off before priming with Resene General Purpose Metal Primer.
2. Once the primer is dry, brush on a coat of Resene SpaceCote Flat in Resene Black for a flat powder-coated look, or a Resene Lustacryl for a more wipe-able surface.
3. Hang it up using three small nails; two at either end and one in the middle. And voilà! An industrial moodboard to clip up ideas for your next DIY project!
