Toys and Games  
with Mark Rayner – 37

### You will need:

- 50mm x 100mm timber (approximately 500mm)
- 20mm x 100mm timber (approximately 250mm)
- 40mm large headed screws
- 65mm screws
- 3.5mm drill bit
- 50mm hole cutting attachment
- Clean cloth
- Electric drill
- Mitre saw
- Paintbrushes
- Pencil
- Putty knife or similar
- Resene Quick Dry
- Resene testpots of Resene Alabaster, Resene Guardsman Red and Resene Nero
- Sandpaper
- Screwdrivers
- Tape measure
- Wood filler

#### Step one

Cut one piece of 50mm x 100mm timber measuring 250mm using the mitre saw. Set the blade at a 45-degree slant and cut another piece measuring 200mm. Smooth any rough edges with sandpaper.

#### Step two

Fix the two pieces of timber together, as shown, using 65mm screws – drill pilot holes first.

#### Step three

Use the hole cutting attachment and electric drill to cut out four 50mm circles from the 20mm x 100mm timber. Smooth any rough edges with sandpaper.

#### Step four

Fill any joins and imperfections in the timber with wood filler. Once dry, sand smooth and then wipe off any sanding residue with a clean cloth.

#### Step five

Apply one coat of Resene Quick Dry to the body and wheels of the van and allow to dry.

#### Step six

Apply two coats of Resene Nero to the wheels and two coats of Resene Guardsman Red to the body of the van, allowing two hours for each coat to dry.

#### Step seven

Paint windscreen, window, door handle and headlight details with Resene Nero and, once this is dry, add other details, as shown, using Resene Alabaster. Allow to dry.

#### Step eight

Fix the wheels to the body of the van using the large headed screws, drilling pilot holes first.

Get creative and make this simple toy using a few pieces of wood and some Resene testpots.

To get the look: Mark painted the background table with Resene Lustacryl tinted to Resene Turbo.

Other ideas: For a dark blue effect paint the van using a Resene testpot of Resene Surfs Up.
