

***This page:*** Environmental Choice-approved Resene Zylone Sheen waterborne paint was used throughout the interiors for a low sheen easy clean surface. Hues were selected from the Resene The Range Whites & Neutrals fandeck.

**Interior paints on the project were chosen** for strength and subtlety of hue – mostly from the Resene The Range Whites & Neutrals fandeck tinted into Resene Zylone Sheen. All communal areas are in Resene Half Black White, with the master bedroom in Resene Black White, and other interior areas in Resene Pot Pourri, Resene Saltpan and Resene Half Iron. The ceiling and skirting are in Resene Alabaster.

The new The Range Whites & Neutrals fandeck offers a wider selection of colours with up to six colour-strength variations of popular Resene colours – giving more options to create a tone-on-tone

look. This was ideal for the interior design on this ICR Consulting project.

Resene Zylone Sheen has many other advantages besides the extensive colour options. Resene Zylone Sheen is a durable, waterborne low-sheen paint, now also available in a VOC-free version – Resene Zylone Sheen VOC Free. In addition, Resene Non VOC tinters are available – thousands of colours can be tinted into Resene decorative paint, without adding unwanted VOCs.
