Weekend DIY with Mark Rayner – 75

### You will need:

- Exterior construction glue
- Paintbrush
- Resene Aquapel and Terracotta Sealer
- Resene testpots of Resene Pohutukawa and Resene Red Herring
- Terracotta bowl
- Terracotta pot

**Step 1**  
Apply a generous amount of exterior construction glue to the base of the terracotta bowl.

**Step 2**  
Place the terracotta pot on top and allow the glue to dry.

**Step 3**  
Apply one coat of Resene Aquapel and Terracotta Sealer to the planter and allow to dry.

**Step 4**  
Apply one coat of Resene Red Herring to the outer sides of the planter and allow to dry.

**Step 5**  
Apply a second coat of Resene Red Herring to the outer sides of the planter and allow to dry.

**Step 6**  
Turn the planter upside down and paint the base rim with two coats of Resene Pohutukawa, allowing two hours for each coat to dry.

**Step 7**  
Turn the planter the right way up and paint the outer and inner top rim with one coat of Resene Pohutukawa and allow to dry.

**Step 8**  
Apply a second coat of Resene Pohutukawa to the outer and inner top rim and allow to dry.

It's easy to create this simple planter using a couple of terracotta pots and some Resene testpots.

To get the look: Mark stained the background fence with Resene Woodsman tinted to Resene Warm Kwila.

**Other ideas:**  
For subtle green effect use a combination of Resene Soft Apple and Resene Parsley.
